## Unitized Wheel Bearing Nut System

The **TRAMEC** line now includes the industry's best spindle nuts, the original **Axilok®** by Maclean Vehicle Systems. Installation should take less than half the time required for the old style, 3-piece-systems. Still greater time savings are realized with **Axilok®** when adjustments are needed.

### The Axilok® Unitized Wheel Bearing Nut System

- Eliminates the traditional three or four-piece nut system
- Easily adjustable, one-piece assembly for increased speed, accuracy and repeatability
- Uses locking clips to maintain joint security and ensure proper end-play
- Significantly reduces the time required for wheel bearing adjustment
- Delivers accurate results in the process
- Unitized part consisting of nut body, two locking clips and a retainer cage
- Installs with standard, six-sided socket
- Saves installation time
- High degree of accuracy
- Results in longer bearing, wheel, and tire life
